

CALL FOR PAPERS

February 22-26, 2021 • Houston

The industry's only forum devoted exclusively to pigging for maintenance and inspection, as well as pipeline integrity evaluation and repair, this event will draw engineering management and field operating personnel from both transmission and distribution companies concerned with improved operations and integrity management.

We encourage you to submit your abstract early, as our program may be almost full by the final deadline.

You are invited to contribute to the proceedings of this vibrant international forum. Attention to pipelines has never been more intense, as their criticality to infrastructure and the incidence of failure due to aging and other factors have increased. Papers will be published and distributed to the conference delegates in encrypted PDF format. **In addition, beginning in 2021, papers presented at the conference will be live streamed to an online audience.**

We hope you will take advantage of this extraordinary professional opportunity and send your proposal for a presentation at the 33rd conference. Proposals should include an abstract accompanied by the author's and co-author's complete contact information. Proposals should be sent to the PPIM submissions portal here:

SUBMIT PROPOSAL

Final abstracts deadline: November 2, 2020
Final paper deadline: January 12, 2021
Final presentation deadline: February 12, 2021
