

The industry's only forum devoted exclusively to pigging for maintenance and inspection, as well as pipeline repair, this event will draw engineering management and field operating personnel from both transmission and distribution companies concerned with improved operations and integrity management.

We encourage you to submit your abstract early, as our program may be almost full by the final deadline.

CALL FOR PAPERS

You are invited to contribute to the proceedings of this vibrant international forum. Attention to the integrity of pipelines continues to intensify, with public concern about safety and reliability of critical infrastructure driving rigorous new regulatory requirements. Papers will be published and distributed to the conference delegates in encrypted PDF format. In addition, papers presented at the conference will be live-streamed to an online audience.

We hope you will take advantage of this extraordinary opportunity and send your proposal for a presentation at the 34th conference. Proposals should include an abstract accompanied by the author's and co-author's complete contact information. Proposals should be sent to the PPIM submissions portal here:

[SUBMIT PROPOSAL](#)

Final abstract deadline: October 5, 2021

Final paper deadline: January 4, 2022

Final presentation deadline: January 19, 2022
